PROFESSIONAL SUMMARY

- Principal Platform Engineer with 16+ years of experience building cloud-native platforms, Kubernetes operators, identity-aware infrastructure, and secure deployment pipelines. Strong expertise in Go, Kubernetes, OCI, Terraform, Ansible, and CI/CD with hands-on experience supporting enterprise identity systems using Oracle Identity Cloud Service (IDCS), OAuth2, SAML, and Role-Based Access Control (RBAC). Experienced in designing secure platform services, Kubernetes automation, and infrastructure that integrates identity, authorization, and cloud security best practices.
- Contributed to the design of secure deployment patterns and security architecture for cloud-native Oracle Database services running on Kubernetes, ensuring secure identity integration, secret management, certificate handling, and least-privilege access controls.
- Currently as Principal Data Systems Engineer at Oracle India, developing Kubernetes operators and infrastructure automation for Oracle Database platforms, contributing to Oracle open-source initiatives, and authoring official Oracle product documentation and cloud architecture whitepapers.
- Recognized for reducing operational risk, improving system clarity, mentoring engineers, and applying disciplined engineering practices across the full system lifecycle.

TECHNICAL SKILLS

- **Languages**: Go, Python, Shell, Java, C/C++
- **Cloud and Containers**: Kubernetes, Docker, Podman, OpenShift, Oracle Cloud Infrastructure,(OCI), AWS, Azure
- **Infrastructure as Code**: Terraform, Ansible, Ansible Vault
- **DevOps**: Teamcity, GitLab CI, Jenkins CI/CD Pipelines, Prometheus & Grafana
- **Identity & Security**: OAuth2, SAML, Oracle Identity Cloud Service (IDCS), Authentication & Authorization, RBAC, Kubernetes Secrets, Oracle TDE Wallets, TCPS, TLS/SSL,OpenSSL
- **Databases**: Oracle Database (RAC/SIDB/Truecache/Dataguard, 23ai, 19c), MySQL, Redis
- **Security and Code Quality**: SonarQube, Fortify, Anchore, Burp Suite

PUBLICATIONS & TECHNICAL CONTRIBUTIONS

- Contributor, *Deploying OKE on Compute Cloud @ Customer / PCA*, Oracle Cloud Infrastructure Technical Whitepaper, Oracle (2026)
- Author / Technical contributor , Oracle Real Application Clusters Installation Guide — Podman / Oracle Linux — Official Oracle documentation
- Author / Technical contributor, *Installing and Configuring Oracle RAC on Oracle Linux Cloud Native Environment (OLCNE)* – Oracle Database 19c product documentation

PROFESSIONAL EXPERIENCE
Oracle India Pvt. Ltd., Bangalore
Sr Principal Data Systems Engineer
October 2017 – Present

Responsibilities:

- Designed, developed, and maintained Go-based Kubernetes operators, CRDs, and reconciliation controllers (Kubebuilder, controller-runtime, Operator SDK) for Oracle Database platforms (26ai, 19c). Supported Single Instance, RAC, DBCS, Oracle Restart, True Cache, and Private Agent Factory, including Release Update (RU) patching, lifecycle management, and fault-tolerant control-plane operations.
- Build E2E test automation for provisioning, scaling, failover, and upgrades of Oracle DB on Kubernetes
- Implemented security controls for Kubernetes-based database operations, including Secrets, Oracle TDE wallets, TCPS, OpenSSL certificate management, and encrypted configuration handling.
- Built Ansible automation to provision Oracle RAC across distributed environments, using Ansible Vault for credentials, certificates, and sensitive configuration.
- Developed Terraform modules and Ansible automation to provision Oracle Kubernetes Engine (OKE) clusters with secure RBAC and identity-aware workflows.
- Designed and maintained secure CI/CD and deployment workflows using Oracle Identity Cloud Service (IDCS) with OAuth 2.0 and SAML, and partnered with Identity, Security, and Platform teams on authentication, authorization, and release processes.
- Integrated security and compliance scanning tools (Fortify, McAfee, Anchore, Burp Suite) into cloud-native build and release pipelines. Hardened database operator security against command injection, shell interpolation, secret exposure, and invalid storage/ASM configurations.
- Contributed to Oracle open-source projects and maintained Oracle Database container images published under the Oracle GitHub organization.
- Mentored junior engineers, provided architectural guidance, and participated in technical interviews and hiring decisions for Oracle.

Notable Achievements:

- Contributed to Official Oracle documentation and Whitepaper for RAC on OLCNE and RAC on Podman
- Enhanced Oracle RAC on Kubernetes with ASM disk lifecycle management, online PVC resizing, scale-out/scale-in reliability, and resilient cluster reconciliation.
- Delivered cross-cluster Oracle Data Guard TCPS support, including external ports, broker connectivity, wallet management, and failover/switchover workflows.
- Built production-grade Oracle Restart and database E2E automation across OCI, bastion tunnels, GitLab schedules, cleanup, and rerunnable CI environments.
- Led the migration of IDCS services from Oracle JDK 1.8 to GraalVM JDK 20.3.3, improving performance characteristics and long-term platform alignment.

Optum Global Solutions (India) Pvt. Ltd., Bangalore
Senior Engineer – Build and Release
February 2016 – September 2017
Responsibilities:

- Designed and implemented CI/CD pipelines for private cloud products using Jenkins, OpenShift, and Bitbucket.
- Implemented containerization strategies using Docker and Kubernetes.
- Enabled SonarQube and Fortify security scans for private cloud workloads.

Notable Achievements:

- Delivered end-to-end CI/CD solutions supporting production deployments across multiple enterprise projects.

Avesta Computer Pvt. Ltd., Bangalore
Software Engineer
June 2014 – February 2016
Responsibilities:

- Managed Subversion, GitLab, SonarQube, and Jenkins-based build automation.
- Led adoption of SonarQube dashboards across more than 20 Cisco projects.
- Successfully migrated and stabilized Jenkins infrastructure of multiple concurrent projects/instances from single Jenkins master hosted in IT.

Aptean Software India Pvt. Ltd., Bangalore
Configuration Management Engineer
April 2013 – May 2014
Responsibilities:

- Developed CI/CD pipelines and Windows installers (rich client and thin client) for the Saratoga CRM product using Flaxera's Installshield tool.

Dell International Services India Pvt. Ltd., Bangalore
Application Management Analyst
March 2011 – March 2013
Responsibilities:

- Managed QA environments and monthly production deployments for Dell enterprise applications including OrderBroker and Dell Premier.
- Led Windows Monthly Patching for 1000+ Windows Servers across entire Dev/QA,Stage and Production Environment of Dell Releases Infrastructure.

Accenture Services Pvt. Ltd., Bangalore
Software Engineer
December 2009 – March 2011
Responsibilities:

- Developed CI/CD pipelines for insurance platforms and automated build/release processes using **CruiseControl**, Java, Maven, Artifactory etc.

EDUCATION

- Bachelor of Engineering (Information Technology)
  Punjab Engineering College (PEC), Chandigarh
  2005 – 2009
  CGPA: 7.9
